Weighing

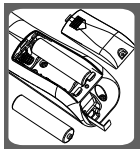

1. Strap the webbing belt through the luggage handle, and secure the hook of the belt onto the triangle ring.
2. Press ⊙ button to switch on the scale before lifting (ensure no stress). You will hear 2 beeps after switching on.
3. When display does not show zero, press ⊙ button to reset LCD to zero.
4. Lift the scale gently. Make sure the scale is horizontal and balanced. LCD shows the weight of luggage. Wait for the weight reading to stop and stabilize, flash 3 times and locked. You will hear 2 beeps after locking on. Usually weight reading will be locked in 2-3 seconds. It will be longer if the weighing object is heavy. Scale will display weight reading for 2 minutes and automatically switch off.
